What Are Six-Figure Grid References?

Four-figure grid references are used to find a grid square...
 ...but we can use six-figure grid references to find an exact location within a grid square, so they are much more accurate than four-figure grid references!

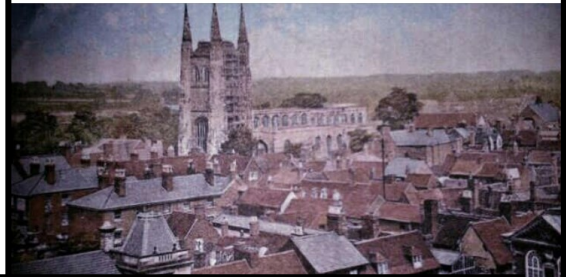

What Are Four-Figure Grid References?

The vertical gridlines are called **northings** and they increase as you move northwards.
 The horizontal gridlines are called **eastings** and they increase as you move eastwards.
